VoiceServe: Weekly Update

Week of 5 to 12 November 2026 · Last week we showed Milestones 1 to 3

> This week we started **Milestone 4 (the full assistant)** and finished its first part. The assistant now answers **five kinds of questions instead of one**: attendance, fees, timetable, exams and assignments. Each question gets a specific answer, by voice or by typing.

1. Completed this week

Four new things the assistant can answer (real answers from our demo student, Aarav):

Student asks	Assistant answers
"*How much fee do I owe?*"	You have 23,500 rupees due in total. The next payment, Hostel Fee (2nd instalment), is due on Sunday, 22 November.
"*Any classes after 2 pm on Monday?*"	You have 1 class on Monday, 16 November after 2 PM: CSE 343, Software Engineering, at 4 PM.
"*When is my next exam?*"	The exam, its date and time, and the seat: R1-S2 in room A-101, Academic Block A.
"*Do I have any pending assignments?*"	You have 4 pending assignments. The next one is Case Study 2 for Computer Networks, due Sunday.

Smarter, more specific answers:

Student asks	Assistant answers
"*What's my hostel fee?*"	Your Hostel Fee of 85,000 rupees is fully paid. Your Hostel Fee (2nd instalment) has 20,000 rupees pending.
"*In which subject do I have least attendance?*"	Your lowest attendance is in Computer Networks, at 73 percent. Attend the next 3 classes in a row to reach 75.
"*What's my next class?*"	Your next class is CSE 305, Database Management Systems, at 12 PM in room B3-416.

- **Understands days and times:** "today", "tomorrow", "on Friday", "next Monday", "after 2 pm", "next class".
- **Two bugs found and fixed by testing it ourselves:** "What's my hostel fee?" used to repeat the total fee, and "Which subject has least attendance?" used to fail. Both now give the right answer.
- **Same safety rules as before:** every amount, date and percentage comes from the database, never invented by AI.
- **Public demo link updated**, and all code backed up on GitHub.

2. In progress

Milestone 4 is **one third done** (part 1 of 3). Part 2 starts next.

3. Need your help with

1. Can we use a small paid budget (capped at $5 a day) for Hindi and Hinglish testing later?
2. Is a demo from our laptop fine for the final presentation, or do we need a permanent website?
3. May we record volunteer students' voices to test accuracy? Is a consent form needed?

4. Plan for next week

- **Open pages by voice:** "Take me to hostel leave" opens the right page out of about 180 menu items.
- **Real pages** for timetable, fees, exams and hostel leave (they are placeholders now).
- **Start filing requests safely:** log a complaint or apply for hostel leave by voice. The assistant reads it back and saves it only after a clear "yes".

5. Numbers this week

Measure	Last week	This week
Kinds of questions answered	1 (attendance)	5
Automated tests passing	259	355
Bugs found and fixed	-	2

Demo login: registration number 24100001, password Demo@1234. All data is synthetic; no real university system or student record is used.
